

Also Chinese problem!

This discussion is archived [cherami](#) 14 posts since

Sep 6, 2001

I am sorry! Though there are many postes talk about this, but I can not find any that can resolve my problem!

I have done! But failed!

I am beginner, and my English is very poor, so maybe I

can't explain my problem!

My system is :

LINUX redhat 7.1 tomcat 3.2.1 mysql 2.23.36 jive 1.2jdk1.3.1.

I set the mysql service's character set to gb2312:

```
/usr/libexec/mysqld --default-character-set=gb2312
```

and add below to /etc/my.conf

<http://www.jivesoftware.com/jivespace/message/54427#54427/client>

```
default-character-set=gb2312;
```

and then create the jive database.

and also add below to every jsp file:

```
<%@ page language="java" contentType="text/html; charset=gb2312"%>
```

my mysql support gb2312 because I see in

```
/usr/share/mysql/charactes/Index:
```

In it have a line like :

```
gb2312 = 28
```

Also Chinese problem!

almost this,I forget it.and my system support chinese,i can see Chinese in my desktop and many applications!

But I can't see any Chinese in my Jive,all is ?????

Why!Who can help me!

Thanks a lot!

Sep 6, 2001 2. **Re: Also Chinese problem!** Sep 8, 2001 8:02 PM

Thanks a lot!

I have tried to install jive2 but failed!

There are many differents between jive 1.2 and jive2,so I have some trouble!

Let me try it again!

If you can tell me how to resolve it in jive 1.2,I will appreciate you very much!
