

Question on New Archive Feature

This thread is archived  [Hunter Hillegas](#) 87 posts since

in 2.6...

Is there a way to archive more than 20 threads at a time?

I have a forum with 32,000 messages in it and that means there are 230 pages in "Manage Content" in the admin. Can I get more than 20 items on a page? That would be really great.

Also, a 'Select All' for the action checkbox would be really nice.

Hunter,

The easiest way to do this would be to go into the archive settings for the forum and select the option to automatically archive all content older than X days. Is that what you're looking for?

Regards,

Matt

Question on New Archive Feature

Is that feature not available in the standard package? I can't find it.

Anyone have more info on this?

Hunter,

Archiving should only be a professional feature - if you're seeing archiving features in 2.6 Basic it's a bug 😊 Are you using basic or professional?

Regards,

Bruce Ritchie

Basic... The reason I thought it was included was that the in the CHANGELOG, the addition of the feature is under 'Core Changes' not 'Professional and Enterprise Changes'.

Bummer.

Hunter,

Sorry for the confusion! We'll get the changelog updated for the next release.

Regards,

Matt
