Jan 17, 2008

Hi

Is it possible to create links such they open in a new tab/window ? The current facility for linking in Rich text editor does not seem to provide that. This would be really helpful in case of linking to external sites.

Looking forward for this addition to a the existing link button which is really good. 😊

Thanks

Also see <http://www.jivesoftware.com/community/message/99403> for the same request and (at least not everywhere) possible workarounds.
