hi Mat,

ClearspaceX and Clearspace 2.0 both should result in the same HTML as far as macros / HTML is concerned. Can you give the macro a try again with the latest Clearspace 2.0 build (I believe we released one today) and let me know (aaron@jivesoftware.com) what happens. I'd like to make sure your stuff works on 2.0 before it ships.

Re: Testing the Appfire FlashCharts...

Cheers,

AJ
