Hello,

I need to make changes to this properties file, but I just did a unix find on our dev installation box, and don't see it. I searched under opt/jive and the exploded app in webapps/

Thanks

Conor

Hi Conor,

You can find this in:

```
<clearspace source root>\src\java\
```

You can also find it in:

```
<clearspace source root>\target\java
```

Thanks,

Where can I find this...

Vinh

Hi Vinh,

I'm using Clearspace 1.10.7.

I cannot locate the file in my servers file system. Where is it in relation the the jiveHome directory?

Once the file is found is it just a matter of editing the value of the keyword property?

Thanks,

Damian

Look at the clearspace_community-xxx.jar in the WEB-INF/lib

We have Clearspace 2.0.3 and for version it is in this jar file.
