Everytime I upgrade our clearspace installation, I get the following template error when certain documents and other pages are loaded.

```
SEVERE: Error in template: <@ww.url action="embedded-doc-list" ><@www.param name="documentID">${document.documentID}</@www.param></@www.url>
```

on line 1, column 103

```
Expecting </@> or </@ww.url> in <@ww.url action="embedded-doc-list" ><@www.param name="documentID">${document.documentID}</@www.param></@www.url>
```

```
freemarker.core.ParseException: Error in template: <@ww.url action="embedded-doc-list" ><@www.param name="documentID">${document.documentID}</@www.param></@www.url>
```

on line 1, column 103

```
Expecting </@> or </@ww.url> in <@ww.url action="embedded-doc-list" ><@www.param name="documentID">${document.documentID}</@www.param></@www.url>

Upgrades in the 2.0.x series product...

This error used to manifest catastrophically, and would prevent the entire page from loading.

In 2.0.3 it seems to be handled more elegantly, as seen in this screenshot.

It seems to have something to do with 'www' vs 'ww'. With previous releases, I have found a line in WEB-INF/classes/template/ to comment out, but can't seem do so with the latest release.

Upgrades in the 2.0.x series product...

Clearspace 2.0.3

JDK 1.6.0\_04

Tomcat 6.0.16

mySQL 5.0.22
