

User Meta-card Info

[thomas.morel](#) 5 posts since

Jun 12, 2008

When I hover over a user's name, the pop-up (I call it a meta-card) shows info about the user.

How do I modify what is shown?

Thomas,

I believe Clearspace calls the mouseover a Tooltip, and it is defined by the QuickUserProfile object found in [resources/script/jive.js](#) file. To change the contents, you'll probably need to change this class and the following templates: The quickuserprofile object is defined in [template/decorator/default/template.ftl](#) and the mouseover method is called in [template/global/include/jive-macros.ftl](#).

Thomas,

I am going to go ahead and close this case, if you have any additional concerns, reply to this thread to reopen the case.
