Is there anyway to get the source code for the formatted text widget?

Thanks,

Cassie

Hi Cassie,

The main widget class is in here:

```
clearspace\src\java\com\jivesoftware\community\widget\impl
```

Is that what you were looking for?

Diana

Hi Diana,

Formatted Text Widget

Not exactly, I'm looking for the ftl file as well so I can see how the tiny-mce.js is called/
instantiated.

Thanks,

Cassie
