We are seeing a type over image issue in the Action box. Is it a browser problem?

See attachment.

shubaram,

I've not seen this happen in Clearspace before. Which version of Clearspace is this occurring on, along with the browser you're experiencing this in.

Can you verify this occurs on alternative browsers such as Firefox, Safari or IE?

I suspect this is a customization issue, does this occur with the custom themes disabled?

We are using version 1.8.

Type over image issue

Its happening with IE, and we are using version 1.8 of Clearspace.

I haven't seen the issue with Safari.

Shubaram,

I couldn't replicate this on my local vanilla instance of 1.8 using Firefox 3, Internet Explorer 6 & 7 and Chrome. I suspect this is a result of your custom theme, could you try disabling any themes and verify whether this is the root cause.

Hey Shubaram,

Any update on this? Did removing the custom theme resolve the issue?
