Hi

I am trying to get the control panel and history links into viewforum.jsp . I have taken the following code from template.jsp and pasted in the viewforum.jsp .

```
<% String header = JiveGlobals.getJiveProperty("skin.default.headerHTML"); boolean
useDefaultHeaderHTML =
JiveGlobals.getJiveBooleanProperty("skin.default.useDefaultHeaderHTML",
false) || header == null || "".equals(header); %>

<ww:action name="accountbox" executeResult="true"/>
```

The above fragment of code is giving me the links to control panel and history. Is there a way where I can manage the HTML code for this. I dont want the description to be displayed. I just want the icon to be displayed. Is there a way for doing this

Thanks

Naga Kishore V

The account box is governed by account-box.ftl, so you might want to take a look at that and see if that can be customized to your liking.

Thanks again Vinh.

I searched for account-box.ftl and did not find that. Could you point me to the right directory. I searched in entire forums directory and did not find one.

Thanks

Sorry, the file should be accountbox.ftl.

Hi Vinh

I was not able to find any ftl file with account. I searched entire directory. I have attached a screenshot of the available ftl files.

Thanks

Naga Kishore

Using a copy of the 5\_5\_22 source, I'm able to find accountbox.ftl here:

```
jive_forums_gold_source_5_5_22\source\jive\app\template\forums\
```

Hi Vinh

Is there any other way apart from modifying the ftl. I have not found the accountbox.ftl. Actually I am trying to customize the look and feel of forums in SAP Enterprise portal running on SAP Web application server.

Please let me know if there is any other way of achieving the same.

Thanks

Naga Kishore V
