

# Question: Having trouble restricting...

I've got a question I need help with.

I set up Jive SBS 3.0 for my company, and because I set it up I was the system Admin and User 1. Now, we're trying to revoke my Admin priveleges. We were able to successfully remove me from the system admin, but I still seem to be able to see all the spaces. There's one that my company would like to restrict me from. What do we need to do? Does it matter that I was the first user? Could that be causing the dilemma?

Any help on this matter would be appreciated!

Thanks!

Dave

Hey David,

It looks like Karl worked with you in another thread on this. As such, I'm going to close down this thread. Please let me know if you have more questions/comments.

Cheers,

Brad
