

Bug? date-picker not showing when...

[Fredrik Norrström](#) 4 posts since

May 27, 2009

Hi,

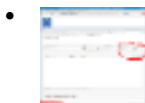

We are currently evaluating Jive SBS public marketplace 3.0.3.

When I create a task in a project the date-picker widget does not show when I click on the button. In the status bar the browser is indicating that it is waiting for some resource on the server. Could you confirm if this is a bug?

Regards,

/Fredrik Jönsson Norrström

Hey Fredrik,

I was able to repro this in 3.0.3 and 3.0.4 with my locale set to Swedish (assuming based on your last post). According to our issue tracking database we've seen this in other languages. I'll update the database accordingly and tag this thread on it.

Bug? date-picker not showing when...

Let me know if you have further questions or comments.

Cheers,

Brad
