When I invoke the ForumService.getMessagesByThreadID() SOAP service I get only 1000 results back from the webservice, even when the thread has many more messages. This happens when talking to a hosted ClearSpace 2.5.7 with the following request XML:

```
POST /rpc/soap/ForumService HTTP/1.1\r\n
```

```
Referer: app:/ForumClient.swf\r\n
```

```
Accept: text/xml, application/xml, application/xhtml+xml, text/html;q=0.9, text/plain;q=0.8, .....
```

```
x-flash-version: 10,0,12,36\r\n
```

```
Content-Type: text/xml; charset=utf-8\r\n
```

```
SOAPAction: ""\r\n
```

```
Content-Length: 392
```

```
User-Agent: Mozilla/5.0 (Windows; U; en-US) AppleWebKit/526.9+ (KHTML, like Gecko) AdobeAIR/1.5\r\n
```

```
Host: forums.adobe.com\r\n
```

```
Connection: Keep-Alive\r\n
```

```
Cookie:
```

```
jive.recentHistory=312c3435323635353b312c3431383938373b312c3434333932333b312c3434343 ..... 
```

```
<SOAP-ENV:Envelope
```

```
  xmlns:SOAP-ENV="http://schemas.xmlsoap.org/soap/envelope/"
```

```
  xmlns:xs="http://www.w3.org/2001/XMLSchema"
```

```
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
```

```
<SOAP-ENV:Body>
```

```
  <tns:getMessagesByThreadID
```

```
    xmlns:tns="http://jivesoftware.com/clearspace/webservices">
```

```
    <threadID>
```

```
      370824
```

```
    </threadID>
```

```
  </tns:getMessagesByThreadID>
```

ForumService.getMessagesByThreadID()...

</SOAP-ENV:Body>

</SOAP-ENV:Envelope>

How do I get all the messages in a thread from the webservice?

Anyone? ForumService.getMessagesByCommunityID() exhibits the same behaviour, if somebody can answer it for that method I would be happy too. Or if somebody could tell me how to get results out of [ForumService.getMessageCountByCommunityIDAndFilter\(\)](#).

Anyone? I will even take a code snippet from a unit / regression test or something to get an example.
