The text in the top icons "New", "Your Stuff", "History", "Browse", now overlays the icons after upgrading to 3.0.5. I've included a screen-shot of before and after. Here is the css for the item outlined in red:

Looks like the ftl files were updated with 3.0.5, so our version don't work anymore. I was able to get it looking right by deleting our customized ftls. I'll have to go and update them from the new versions.
