Jive for Healthcare Collaboration

Healthcare systems are coping with rapid shifts in care delivery, reimbursement and patient expectations. It's more critical than ever for clinicians to communicate and collaborate easily and without obstacles to deliver value-based care. Jive simplifies clinicians' lives with a single platform for secure care collaboration, critical communications and an eHealth record (EHR) support experience they'll actually like. Jive supports HIPAA compliance and signs HIPAA Business Associate Agreements with customers.

Improve the patient experience
Empower primary care physicians, specialists, nurses and other care team members to collaborate securely on their own time, from anywhere.

Simplify physician communications
Cut through the noise to deliver critical communications to physicians at their desks or on the go, no matter how many hospital systems they're affiliated with.

Improve clinician productivity with EHR support
Educate, communicate with and support clinicians throughout your eHealth records system implementation and beyond. Jive has helped health care organizations save $millions on their EHR optimization efforts.

Drive alignment across merged health systems
Unite staff with a shared vision and empower them to ask questions, give feedback and work together to translate ideas into effective action.

Features and Capabilities

- *Secure collaboration connects clinicians via laptops and smartphones.*
- *Private groups where clinicians can share best practices and coordinate patient care.*
- *Strategic communications: keep clinicians informed and aligned with engaging news pages, blogs and announcements.*

- *Support Center: provide easy-to-use self-help resources – FAQs, knowledge base articles, how-to videos and more – on EHR and other systems.*
- *Mobile optimized: secure, easy-to-use app lets clinicians collaborate, communicate and stay informed wherever they go.*
- *Fast setup and streamlined administration.*
- *Supports HIPAA compliance; ISO 27001:2013 certified.*
