

# Jive Interactive Intranet

The Gateway to Your Most Valuable Assets—Your People and Your Knowledge

It's time to modernize your intranet and bring the power of integrated collaboration to your organization. Jive goes where no intranet has gone before, connecting all your people, knowledge, and content in a secure collaboration and communication hub across mobile and desktop devices. It's an out-of-the-box intranet that people really use and helps employees discover the relationships and expertise they need to know – all while slashing total cost of ownership and enhancing other applications, like Microsoft Office 365.

## Solves Your Biggest IT Challenges

### End Silos

Go beyond disconnected tools and captive platforms with an open collaboration hub that unites people, information, and systems across the enterprise.

### Drive Strategic Alignment

Turn a fragmented organization into a cohesive team where everyone contributes and shares your company's vision.

### Cure Corporate Amnesia

Make work visible, searchable and shareable, maximizing your collective brainpower and building permanent institutional memory.

### Unify Your IT Landscape

Integrate disparate tools and systems in one seamless experience for high-performance collaboration and innovation.

## Features and Capabilities

- **Knowledge discovery:** Jive WorkGraph and machine intelligence proactively connect employees with colleagues, information, and expertise.
- **Complete digital workplace and interactive intranet:** comprehensive communications, collaboration, company directory, enterprise search, and more.
- **Cross-functional collaboration:** within teams and departments, across functional groups and ecosystems (including partners and contractors).
- **High-impact communications:** beautiful news pages and streams deliver corporate communications in a can't-miss, must-read layout.
- **Totally mobile:** compelling, consumer-style mobile app keeps employees connected and productive everywhere — even deskless workers.
- **Out-of-the-box integrations:** ready-to-use integrations for Microsoft, Google, Salesforce, and more.
- **Easy setup, low TCO:** pre-built spaces for employee onboarding, employee support, IT help desk, and more. Easy configuration and administration without IT help. Cloud deployment. Robust security and privacy controls.

"The ultimate benefits are that Lloyds becomes more agile, that it becomes more innovative, that it's able to harness the knowledge that's in the group, but it's also able to retain that knowledge. So if people leave or people move in teams, everything that they're saying is being captured and people can use that to look at that information, learn from it, innovate from it, and create better solutions."

- Lloyds Banking Group

"We've been able to align our organization with our new strategy. It's a complicated strategy and people have been able to grasp it really quickly through the use of the Jive platform."

- Pearson

"Everybody can meet everybody and initiate any kind of communication and collaboration on the same platform in real time. And whatever is created there is available for everybody else. Nothing gets lost."

- Allianz

"Jive has taken a big load off my team from an operations perspective and also provides a collaborative, modern, engaging platform for our employees to collaborate with us around the IT enhancements we're bringing to the firm."

- Grant Thornton
