

Jive for Government

Break down silos and enable fast, fluid federal agency collaboration with a secure cloud solution. Jive brings together all your people, content and knowledge in one digital workplace, improving both the quality and timeliness of agency work while driving new efficiencies, employee engagement and substantial cost savings.

Harness collective knowledge

Find the known and unknown experts in your organization with rapid search, rich skill profiles and powerful networking capabilities. Capture collective know-how and build permanent institutional memory.

Engage your employees

Motivate and engage federal employees and contractors with compelling, targeted communications, great onboarding experiences and training in a social environment. Measure the impact with real-time analytics.

Modernize IT

Simplify and secure your IT landscape with a turnkey cloud platform that reduces your data center footprint, maintenance and operational costs.

Stay connected on the go

Stay in touch and in sync with your colleagues and community, wherever you go and with whatever mobile device you use.

Work securely with external partners

Securely work with contributors from industry, academia and other external organizations, with robust, fine-grained privacy and access controls.

Government-Grade Security

Jive's solution hosted through FedRAMP-certified AWS GovCloud.
